ABOUT ME

Software Engineer, product manager, and DJ working at the point where music meets technology. I have shipped consumer music and AR products end to end, from discovery and screen design through to live deployment, reaching over 5,500 users across a Snapchat lens and a streaming app. Alongside this I run 3N4WRLD, my own DJ, production and event business, where I have produced four shows, played over 100 stages across two countries and released 8 mixes on SoundCloud. I work fluently across the major DSPs, read engagement and streaming metrics closely, and enjoy the coordination and detail that keeps a campaign moving. Currently completing an MSc in Artificial Intelligence.

KEY ACHIEVEMENTS

- Shipped a live Snapchat AR lens to over 5,000 users in three weeks, leading a 3 person team from first sketch to launch and pitching the product to an audience of over 50 including Snap product and engineering.
- Took an afro gospel streaming app from concept to public launch at Ariro Inc, designing 13 screens end to end and owning catalogue positioning and release strategy, reaching over 500 users.
- Built 3N4WRLD from a bedroom set into a four show event series with over 1,000 combined attendance, peaking at 450 to 500 guests, with paid campaigns reaching over 10,000 people in three days and the first show selling out its 50 online tickets before doors.
- Released 8 mixes on SoundCloud with over 500 likes across the catalogue, promoting one to over 300 listeners, 35 likes and 5 comments, and using the platform data to work out which tracks and posting patterns were and were not landing.

WORK EXPERIENCE

Product Manager and AR Designer, Intern

Snap Inc, Snap Lens Lab | London, UK |
Jul 2026 – Aug 2026

- Led a 3 person team from first sketch to a working AR lens in three weeks, owning scope, delivery plan and success metrics.
- Defined the product: a virtual room for shared listening using surface detection, with tappable objects, a mood and scene system and a placement model for music lovers, independent artists and labels. Cut scope twice to hold the deadline and documented the rest for future build.
- Learned Blender from scratch and produced 4 in lens 3D assets, removing a dependency the team had no time to source.
- Pitched to an audience of over 50, taking live Q&A from Snap product and engineering and the RCA board.
- Lens is live with over 5,000 users

Founder, DJ and Event Organiser

3N4WRLD Entertainment | Abuja, Nigeria
Sep 2023 – Present

- Curated, produced and headlined 4 shows under the WRDL Tour series, drawing over 1,000 combined attendance and peaking at 450 to 500 guests at BOIL3RWRLD.
- Owned branding, stage design and creative direction across all flyers and the promo film, which I scripted and directed.
- Ran paid social reaching over 10,000 people in three days, selling out the first show's 50 online tickets before doors.
- Negotiated vendor and sponsor deals, wrote artist tech riders including Cali-Ber Tha Grime, and managed run orders, guest lists and ticketing across every event.
- Grew one of my mixes to over 300 listeners, 35 likes and 5 comments, then read the platform data back to work out what drove it and what to change next.

Technical Skills & Tools

- **Digital platforms:** Spotify, Apple Music, Amazon Music, YouTube Music, SoundCloud; playlist curation and pitching.
- **Music:** DJing across Afrobeats, amapiano, gqom, 3 step, house, alte, EDM and pop; music co-production, mixing and mix releases
- **Design:** Figma, Canva, Blender, Lens Studio, design systems, brand identity, decks and ad creative, stage design
- **Data and analytics:** Reading platform and campaign metrics to diagnose what is working, R, SPSS, Advanced Excel, user research
- **Coordination:** Administration and scheduling, acting as point of contact, stakeholder and partner relations, vendor and sponsor negotiation, run orders and ticketing
- **Event production:** Budgeting, artist tech riders, guest lists, paid social and campaign management, stage design
- **Ways of working:** Agile delivery, Microsoft 365, Google Workspace, Claude, ChatGPT, Smiling on the Job and Music makes me proactive while working
